Claim Objections

1. Claims 1-22 are objected to because of the following informalities: Regarding claim 1, Applicant is requested to change "and encoding node selection information representing... within the multi-stage network", lines 3-4, to --- by encoding node selection information representing... within the multi-stage network ---, since by encoding node selection information, paths for flows within a multi-stage network made up of processing nodes could be achieved. The same reasoning applies to claim 15.

Appropriate correction is required.

Allowable subject matter

2. Claims 1-22 would be allowable if claims 1 and 15 are rewritten or amended to overcome the objection set forth in this Office action.
